

International Calling Authorization

Due to the prevalence of international toll fraud taking place in the telecommunications industry, Globalgig is taking proactive steps to protect our valued customers and network from international toll fraud. Globalgig is electing to disable all international long distance by default for all customers unless they opt-in to the service. By opting in to international service, the customer must read and agree to Globalgig's terms and conditions and Acceptable Use Policy (<https://global.globalgig.com/legal/voip-terms/>) and acknowledge their acceptance by returning this signed form which indicates that you have read and accept Globalgig's Terms and Conditions and Acceptable Use Policy. There is no additional charge for having international service enabled on your account. However, International usage rates do apply.

Whether customers opt-in for international service or not, Globalgig stresses the importance of verifying the security measures implemented around customers' PBX systems and/or handsets. Customers who have been compromised and victims of toll fraud have been found to have one of these implementations:

- Handsets on public IP addresses (not firewalled).
- PBX systems not properly secured, or left as open relays or proxies.

These are just two of the fraud victim scenarios Globalgig has seen, but there are many more. Please ensure that your IT Staff understands the risk of toll fraud, and implements proper security measures.

By opting in to International Service the customer acknowledges they have agreed to Globalgig's terms and conditions and Acceptable Use Policy. International usage rates will apply for all international calling.
