

PLATFORM-AGNOSTIC SD-WAN SOLUTION INDIVIDUALIZED FOR EVERY ENTERPRISE

Network Design Derived Form Your Network and Applications Flows

An Unbiased Approach to SD-WAN Solutions Development

Globalgig brings a unique and unbiased approach to its SD-WAN solution, one that leverages an analysis of a customer's application flows, business policies and network architecture to derive the right solution. Unlike competitors, Globalgig's SD-WAN offering is not tied to a specific technology, platform or service supplier. Enterprise customers can be assured that the solution designed and delivered is optimized for their operating environment.

In-Depth Discovery Services By Networking Experts

Initial discovery service including network review, performance analysis, requirements identification, and project scoping is performed by Globalgig's SD-WAN Advisory Practice that is staffed by experienced technologists and engineers with proven track records of designing, implementing and managing SD-WAN service for large enterprises. Globalgig's SD-WAN solutions can be customized to work with hybrid networks, networks in transition, and pure-play DIA networks. Solutions can be developed for all architectures, and network designs are inclusive of security, cloud and application performance requirements.

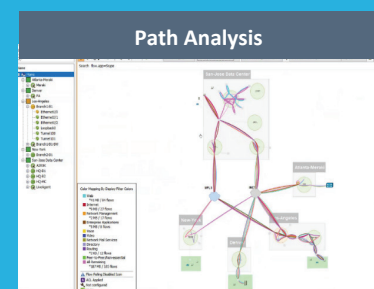

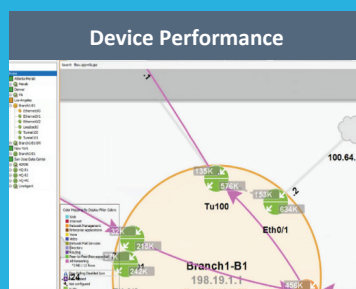

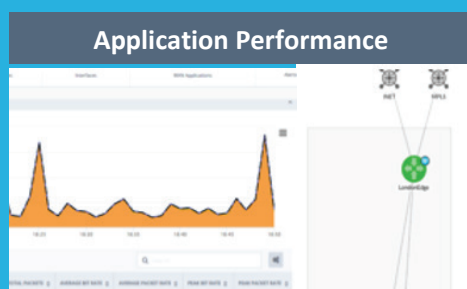

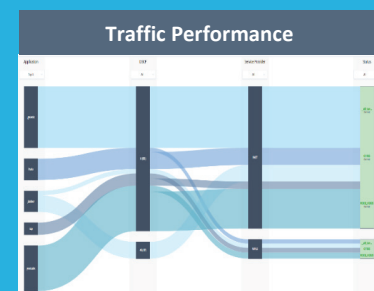

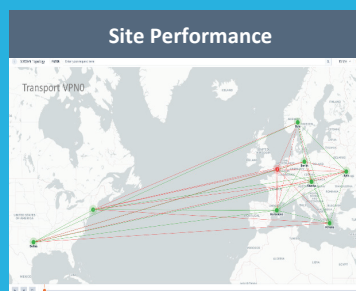

The Globalgig Advantage

- Global Coverage for Wired & Wireless Services: one provider, one support team, one invoice
- Platform Agnostic: Globalgig works with customers to determine the best platform based on their requirements
- Carrier Independence: our solution is not based on a specific carrier's network.
- Ease of Migration: support hybrid networks for integration with SD-WAN over time
- Built-in Security: NGFW/SIG/UTM with Viptela, Meraki and Fortinet
- Global Support: install, support and manage complex, multi-carrier solutions

Managed SD-WAN – From the Physical Layer to Application Flow

Globalgig's Managed SD-WAN service uses flow-based tools to provide comprehensive network management and monitoring, from the equipment and connectivity layers to application flow. Our managed service delivers the end-to-end view at a layer above the SD-WAN orchestrator, providing network intelligence that enables proactive management and troubleshooting based on real-time events.

Managed SD-WAN Services

Globalgig offers 3 levels of managed SD-WAN services, giving customers multiple options to align service level with their needs. Our managed SD-WAN service is built on industry-leading network performance and support management platforms. Customer networks are actively managed by our experienced staff of engineers, technicians and support personnel to deliver the performance required for critical applications. From basic monitoring to full management including insights into application performance, Globalgig's managed SD-WAN service is designed for today's dynamic business operating environment. Global Support: install, support and manage complex, multi-carrier solutions.

Management	Essential	Plus	Premier
Hardware/circuit monitoring and trouble resolution	✓	✓	✓
Monitoring - ping and SNMP from Globalgig end-point monitoring system	✓	✓	✓
Hardware visibility and reporting including WAN interfaces, LAN uplinks, physical interfaces on level 2 switches	✓	✓	✓
Full device firmware management		✓	✓
Full device configuration management		✓	✓
Network and flow intelligence resulting in better end-user experience			✓
Application monitoring visibility and reporting			✓
Enhanced troubleshooting and capacity planning			✓

Wireless for Hard-to-Reach Locations & Failover

Globalgig's wireless WAN service is ideal for locations inaccessible by wireline networks or where connectivity is needed for lower bandwidth applications such as branch offices, point of sale locations, construction sites, kiosks and ATMs. Wireless WAN connections can also be leveraged for immediate and flexible failover connectivity for business continuity, providing a true diverse path for SD-WAN networks and a cost-effective backup for mission-critical applications.

One Provider for Global Wireless Coverage with Static IP Addressing

Globalgig SD-WAN customers can take advantage of wireless WAN service in 200+ countries with Globalgig's patented multi-carrier SIM. Affordable and standard data bundles can be customized for SD-WAN solutions. Data usage in multiple countries can be combined with the same terms, on a single bill, drastically reducing management resources for negotiating multiple carrier contracts and invoicing in multiple currencies.

About Globalgig

Globalgig orchestrates hyperconnectivity for the enterprise business continuum using managed communications solutions. Globalgig provides wireless connectivity across a 200-plus country footprint and offers a full suite of communications services and products including Hosted VoIP, Mobile Device Management, Wi-Fi Hotspots, Remote Office and Backup, Technology Expense Management and IoT/M2M connectivity solutions. Globalgig is headquartered in San Antonio, Texas, with offices across the U.S., and in the UK, France, Morocco, Mexico and Australia.
